

# On the Importance of Service

**A**t Schetter Electric Inc. we believe we stand apart. From the day the company was founded in 1958, by my father, Howard, we have taken pride in being one of Northern California's most dependable, experienced electrical contractors.

In 2001, the company's gross volume topped \$36 million, thanks to the teamwork of 25 office and 150 field personnel. At Schetter Electric Inc., it's the people who make the difference. Our high standards require that we employ only the very best workers. All of our crews are comprised of NECA/IBEW-trained professionals. Working as a team, we make sure your

project gets the personal attention it deserves — from start to finish. Whether it's a major, multi-million dollar electrical installation or a simple service job, Schetter Electric still offers the same commitment to high-quality work, completed promptly and professionally.

Our four decades of experience allow us to anticipate and circumvent obstacles before they adversely affect a project. And every project is backed by our in-house service department. No wonder some of our customers have been with us for more than 30 years.

Schetter Electric is also involved with the community. Whether it is donating Arco Arena events tickets to

underprivileged Sacramento children, the annual donation to the Salvation Army, providing material and labor to support the McClatchy High School 24-Hour Run, or supporting the local Boy Scouts and Girl Scouts, Schetter Electric believes that giving back to the community is a part of our commitment to the Sacramento area.

Service with integrity has always been the focus at Schetter Electric. Delivering high-quality electrical construction and maintenance services, efficiently and cost effectively, is how Schetter Electric intends to remain in a class by itself.

— Frank Schetter, President  
Schetter Electric Inc.

## S c h e t t e r   a t   W o r k

The Schetter team has been busy in the Capital Region the last year working on numerous public and private projects, not the least of which is McClellan Business Park, a converted Air Force Base that is being turned into a nationally-recognized commercial business park. Schetter is involved in a major overhaul at DECA (otherwise known as Western Hemisphere Commissary Headquarters), a retrofit of the Pacific Jet hangar and the Caltrans buildings. In addition, Schetter Electric has been upgrading the Wherry base housing and other projects on the base such as USDA Forest Service and TRW.

Customer service, commitment to quality, and on-time service are the reasons that McClellan Park has made Schetter Electric, Inc. a preferred provider.

Elsewhere, Schetter Electric Inc. is working on such notable projects as the Placer County Main Jail, Pacific Coast Producers in Woodland, SETA (Sacramento Employment & Training Agency), and Delta Dental.
